^ Safety first for Fido

Keep your dog safe and happy with an innovative collar, leash, or safety light designed for just that purpose by tazlab. The safe-t-stretch collar stretches when it's not clipped with a leash, allowing dogs to slip free in potentially life-threatening situations. The leash features a sliding buckle that easily clips around your waist or a stationary object for short term tethering of your dog with no hassles. The integrated whistle is there for the safety of the owners, just in case Fido is not so brave. \$10-\$15 at Portland's Furever Pets, or www.tazlab.com.
