TAZLAB

This is one of our favorite new dog accessories. When Tazlab's founders heard that a friend's beloved dog choked to death when his collar got caught on a fence, they began searching for a safety collar. Finding nothing that suited them, they came up with a design that combines form and function with their innovative Safe-T-Stretch collar. Their mission is to consistently create new and safer ways to outfit your canine companions. Tazlab's innovative Safe-T-Stretch nylon collars, Slide Tech leashes and accessories are all available online at www.tazlab.com.

PETS ON RUGS

Do you have a fabulous photo of your favorite pooch and it's simply too good to just stick into a dusty old frame? Why not create a terrific home accessory with Pets On Rugs? All you do is supply them with a digital image of your pup and they do the rest... These serged 100% nylon rugs are available in several sizes and shapes to enhance any décor. They are easily cleaned and will never fade, because your pet's image is injection-dyed into the carpet, not merely stamped on the surface. Visit them online at www.petsonrugs.com

DOGGY-SAFE

Is that stinky trash can chock-full of empty tin cans, chicken bones and coffee grounds — your trash and your pooch's delectable treasures — too much temptation for your furry friend? We have found the first "dog-proof" trash can. The Doggy-Safe implements a patent-pending anti-tip device that prevents your pooch from knocking it over in search of those delicacies you tossed out. It also comes with mounting hardware that allows you to secure it from either side to a wall or cabinet. Other features include a removable plastic liner. Uses standard tall kitchen bags. Find the Doggy-Safe can in pet stores, house ware stores and online.
